

Amendments to the specification

At page 14, please add the following heading after, line 4

Brief Description of the Drawing

Please replace the paragraph beginning at page 14, line 4, as follows:

Figure 1 provides the results of amino acid sequence determinations for isolated 59 kDa (bovine heart) (SEQ ID NO: 17) and 63 kDa (bovine brain) (SEQ ID NO: 27) CaM-PDE proteins in alignment with the complete sequence of the 61 kDa (bovine brain) (SEQ ID NO: 6) isozyme. Identities of the 59 and 63 kDa proteins to the 61 kDa isozyme are underlined. Tentative identifications are in lower cases and hyphens denote unidentified residues. The N-terminus of the 59 kDa isozyme, as determined by the subtraction of a methionyl peptide (mDDHVTIRRK) (amino acids 1- 10 of SEQ ID NO: 17) from the composition of an amino-terminal blocked lysyl peptide, is in parenthesis. Solid boxes are placed above residues within the CaM-binding sites identified in the 61 and 59 kDa isozymes.
